SEEDS

IMPLEMENTS

P. MANN & Co.
207-7th St. N.W. Washington, D.C. OPPOSITE
CENTRE MARKET.

ESTABLISHED 1869.

INSTRUCTIONS TO PURCHASERS

HOW TO REMIT.—Remittances should be made by either in the form of Money order, Bank Draft, Express Order, Registered Letter or cash may be sent by express. Postage stamps received same as cash. Remittances in any other way are entirely at sender's risk.

WHEN TO ORDER.—We are prepared to fill your orders as soon as this catalogue reaches you, so please order early.

ABOUT FORWARDING.—Every order is executed at once upon its receipt, or a reason given why it has not been sent, so that parties ordering may know that if goods are not received in proper time, it is almost certain that the letter has not been received by us.

SEEDS ARE GUARANTEED to arrive safe and in good condition, due care having been given to observe faithfully the previous and following suggestions, in all cases where the order is accompanied by the necessary remittances.

NAME AND ADDRESS should be written as plainly as possible, and care exercised to have place of residence, county and state in full, giving all shipping directions. This is imperative and of vital importance, as we frequently receive orders and letters desiring information, etc., without any signature, or wanting in some other particulars, to which, of course, we are unable to respond. Thus, what may sometimes appear to be negligence or error on our part is very often due wholly to lack of care on the part of our customers.

TO OUR PATRONS.

WE TAKE pleasure in presenting our New Catalogue of Seeds and Implements, which upon examination will be found larger and more complete than ever before. The advantage of our well-earned experience in selecting a superior stock of seeds we cheerfully share with our patrons, old and new.

In soliciting further favors of our customers we will say that the stock of Seeds and Implements described and illustrated in this Catalogue are of the same high standard quality as we have furnished heretofore, with new varieties added, which we feel assured will meet the same approval as our former introductions.

If you have never tried our Seeds we shall be pleased to have your inquiries and orders for these, as well as orders in our full line of Agricultural Implements which we carry in stock for the gardeners and farmers. We promise you courteous and business-like treatment.

Our prices are low and we invite comparison. While we believe price is of secondary importance to the successful gardener and farmer, yet it is by no means to be overlooked. Our aim is to supply the best goods at the lowest possible prices. We solicit a share of your orders and remain,

Yours very truly,

P. MANN & Co.

TELEPHONE 1121 MAIN.

ASPARAGUS.

CULTURE.—Seed of Asparagus should be sown as early in the spring as the soil can be worked into good condition, as the seed germinates best in cool, moist weather. Sow thinly in drills and when well started thin out to three inches apart. In the fall or following spring transplant to permanent rows or beds, setting the plants one and one-half feet apart each way. Soaking the seed for twenty-four hours in tepid or warm water before sowing will greatly assist germination. A “packet” contains about three hundred seeds, and an ounce fifteen hundred.

Use two ounces of seed to 100 feet of row in seed bed: two pounds will produce enough roots to set one acre of land, one and a half feet in row, rows four feet apart, or about eight thousand plants. One hundred plants will make a bed for an ordinary family.

Conover's Colossal.—The standard variety. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 50c. 1 year old roots 50c. per 100; \$4.00 per 1000; 2 year old roots 75c. per 100; \$4.00 per 1000—sent by express at expense of purchaser.

Palmetto.—This asparagus is now quite extensively grown for New York and Philadelphia markets, where it sells at high prices, owing to its fine size and regularity. Although of Southern origin, it is equally well adapted to the North. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 25c. Lb. 75c. Roots 75c. per 100; \$4.00 per 1000.

Barr's Mammoth.—This fine variety has brought in market thirty-five cents a bunch when other asparagus was selling for ten and fifteen cents. The stalks are very large, frequently an inch in diameter, with few scales; the stalks retain their thickness completely up to the top of the shoots, and have close round heads. They are extra quick growing, very tender and succulent, entirely free from woody fiber, and make shoots fit for market in a single day. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 25c. Lb. 75c. Good strong roots, 1 year old, 50 for 60c. \$1.00 per 100 by mail, postpaid. By express, 1 year old, 65c. per 100; 500 for \$2.50; \$4.50 per 1000. 2 year old roots, by express, 75c. per 100; \$6.00 per 1000.

DWARF OR BUSH BEANS.**GREEN-PODDED VARIETIES.****DWARF BEAN CULTURE.**

Dwarf Beans may not be safely planted until the middle of April owing to the late frost, but may be planted thereafter as desired, until the middle of August.

Select high rich soil, make drills two feet apart, drop beans along the rows and cover with earth. Hoe often and keep earth to the stems.

Early Mokawk Six Weeks.—This is a long, flat-podded and very productive variety, withstanding a greater degree of frost and cold weather than any other variety, and on that account is preferred and selected for first planting; is also an excellent variety for pickling, for which purpose it should be planted about the last of August. Pint 15c. Quart 20c. Peck \$1.00. Bu. \$4.00.

Early Yellow Long Six Weeks.—In growth and maturity is very similar to the Mohawk and is a very popular variety in the South, pods long and flat, very productive and ripens about the same time. Pint 15c. Quart 20c. Peck \$1.00. Bu. \$4.00.

Early Round-Pod Red Valentine.—Is the favorite sort for growers who supply the early markets, because its growth is so rapid, and because it stands shipment perfectly. Canners use them for their packing because they are stringless and always tender, besides having beautiful round pods. It is a heavy cropper, and ready to pick in about forty days. Pint 10c. Quart 20c. Peck \$1.00. Bu. \$3.50.

Stringless Green Pod.—This new bean produces a vine similar to Red Valentine, but develops pods to edible condition two or three days earlier than Valentine, that is to say in thirty to thirty-one days from germination, which extraordinary maturity for table at once advances the Stringless Green Pod to the first rank among table beans. The pods are green, not quite so round as Valentine and less curved. The pods are stringless—absolutely so—this quality at once placing the variety at the top of the list among table beans. While the early maturity is of great merit, this stringless quality is of particular value, the pods breaking as short and free as pipe stems. Pint 15c. Quart 20c. Peck \$1.25. Bu. \$5.00.

Refugee, or 1,000 to 1.—The standard late pickling variety; matures two weeks later than the extra early kinds. Very valuable for pickling. Pint 10c. Qt. 20c. Peck \$1.10. Bu. \$4.00.

Dwarf Horticultural, or Dwarf Cherry.—A splendid bean for use on the table as a snap bean or for winter use. It is large, meaty and meets the requirements of the market, the table and shipper. Pint 15c. Quart 25c. Peck \$1.25. Bu. \$4.50.

BUSH BEANS.**WAX PODDED VARIETIES.**

Davis Kidney Wax.—A new variety introduced 1897 season. It is adapted alike for the canner, market gardener, shipper or amateur. The dry bean is large, kidney shaped and white in color, making it one of the best for cooking in the dry state. The pods are long, mealy, stringless, and of a beautiful yellow color. It stands shipping better than any other, and is one of the best of the wax podded varieties. Pint 15c. Quart 25c. Peck \$1.50. Bu. \$5.50.

Dwarf German Wax.—One of the finest of Snap-shorts, and the oldest of the Wax varieties; pods transparent, waxy yellow, and snap like pipe-stems; boil as rich as butter, and, when highly seasoned, are luscious; they are thick and very tender, entirely stringless, and fully as early as the Valentine; one of the best market varieties. The bean, when ripe, is black. Pint 15c. Quart 25c. Peck \$1.25. Bu. \$5.00.

Improved Golden Wax.—(Rust-proof).—This variety, the pods of which are of a dark rich, golden yellow color, is rapidly surpassing the famous Golden Wax, which has been the most popular and most desirable of all Wax varieties. It is a vast improvement not only in the size of its pods and productiveness, but it is not liable to rust, even in the most unfavorable weather. Seasons that have almost entirely destroyed the crop of Golden Wax by rust the Improved variety stood without a blemish to its pods. Pint 15c. Quart 25c. Peck \$1.25. Bu. \$5.00.

POLE BEANS.

Add 15c. per quart extra if to be sent by mail.

1 quart to 150 hills, 10 to 12 quarts to the acre.

CULTURE.—Choose light soil, and make small hills 3 feet apart, having previously spaded deeply and fertilized. Plant long poles two feet deep in the centre of the hills.

Allot six beans to each hill, covering them barely beneath the surface, their eyes downward. Do not allow more than three to climb a pole, but remove extra plants to hills where less than three have sprouted.

The Lima Bean is very delicate, and often fails to sprout from slight cause; they should not be planted until the ground is warm, or started in hot-beds and transplanted.

Extra Size Large Lima.—Large white bean, very tender; used without shell; equally good in winter, if soaked 6 to 10 hours before cooking. Pint 15c. Quart 25c. Peck \$1.50. Bu. \$6.00.

King of the Garden.—Large bean and pod; very heavy cropper. Pint 15c. Quart 25c. Peck \$1.75. Bu. \$6.50.

Speckled Horticultural, or Cherry.—Very productive; equally good in the green state or when shelled. Pint 15c. Quart 25c. Peck \$1.50. Bu. \$5.50.

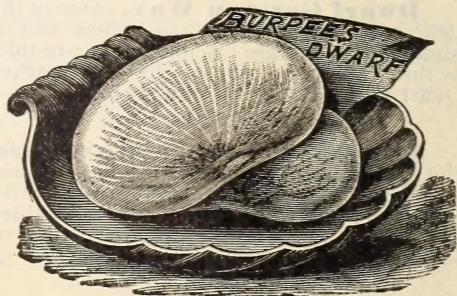

Kentucky Wonder, or Improved Old Homestead
We regard this variety as being the most desirable, best and earliest of all the green-podded running beans. It is enormously productive, the pods hanging in great clusters from top to bottom of pole, which are of a silvery-green color and entirely stringless; they cook deliciously tender and melting; they are a very great favorite, and strongly recommended, especially for the South, in preference to the Southern Prolific, which has been the old favorite of that section for many years. Pint 15c. Quart 25c. Peck \$1.75. Bu. \$6.50.

Scarlet Runner.—This variety grows about twelve or fifteen feet; foliage bright green and flowers brilliant scarlet; it is generally cultivated as an ornamental climber, and is very attractive; it is used in many localities as a vegetable; the pods are of a bright scarlet color, and when young are very tender and excellent when shelled. Quart 30c. Peck \$2.00. Bu. \$7.00.

Lazy Wife's Pole.—The naming of this variety was evidently a misnomer, as it is not expected of wives to do men's work. Let men pick the beans and wives will prepare them for the table, as there are more lazy men than there are lazy wives. It is, however, a remarkable variety, not only for its great productiveness but also for its fine quality. The pods are produced in great clusters, and almost a handful can be grasped at once, which makes the picking of them an easy task. They continue bearing throughout the season. The pods are broad, thick, fleshy, and from four to six inches long, and when young entirely stringless; are of a rich buttery flavor. Beans when dry are white, and are also unsurpassed as shell-beans for Winter use. Pint 15c. Quart 30c. Peck \$1.75. Bu. \$7.00.

BURPEE'S DWARF LIMA.

This is a bush form of the well-known large White Lima Bean. It is very fixed in its bush character, growing to a uniform height of about twenty inches, and forming a circular bush two to two and a half feet in diameter, yielding from fifty to two hundred pods similar to those grown on the Large White Lima Pole Beans, and contain as many beans of the same delicious quality. (See cut). Pint 15c. Qt. 25c. Pk. \$1.75. Bu. \$6.50.

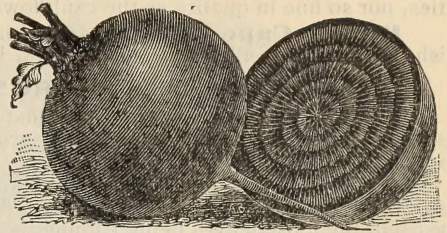

KING OF THE GARDEN.

BEETS.

CULTURE.—Seeds should be sown thinly in drills one-half to one inch in depth. Make the first sowing when the trees are starting out in leaf and continue with additional plantings every three or four weeks until August 1st, so that a constant supply of fresh, tender roots may be had throughout the season. Owing to the spongy character of beet seed, the soil covering the seed should be packed firmly, either with the foot or roller, to insure proper germination. When the young plants are two or three inches in height they should be thinned to stand four to six inches apart in the rows. Those pulled out are excellent when cooked like spinach, or may be transplanted to other rows for an additional supply.

Seed may be sown also early in a hot-bed and transplanted to the garden when the season is warm enough.

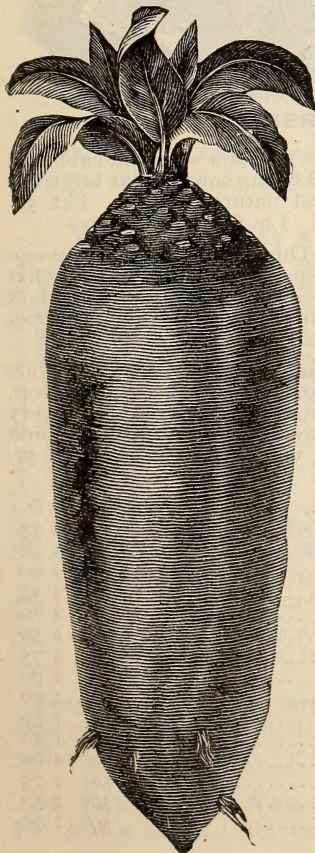

While we exercise the greatest care in selection of our crops for seed, the color of the flesh in the early sorts will vary considerably with different soils and seasons. A "packet" contains about five hundred, and an ounce package two thousand seeds. Use one ounce to 100 feet of drill: four pounds per acre, in rows three feet apart.

MANGEL WURZEL AND SUGAR BEET

FOR STOCK FEEDING.

Golden Tankard Yellow-Fleshed Mangel.—This distinct variety is a most important addition to our list of roots for stock feeding, as it contains less water and more sugar than any other mangel. A special feature is the rich deep yellow color of the flesh, nutritious and milk-producing qualities. ¼ lb. 15c. Lb. 30c. 5 lbs. or more at 20c. per lb.

Champion Yellow, or Orange Globe Mangel.—Productive, easily pulled, and an excellent keeper when stored in heaps for winter use. It is spherical in shape and is of an orange-yellow color. The flesh of the root is white, firm and sugary. ¼ lb. 15c. Lb. 30c. 5 lbs. or more 20c. per lb.

Improved Mammoth Prize Long Red (also called **Norbtain** and **Giant Jumbo Mangel**).—The heaviest cropping and best long mangel. This mammoth variety grows to an immense size, single roots weighing twenty to thirty pounds each, and always of very fine texture and good quality. Henry Hodgson, of Millersville, Ohio, raised on one acre 55,750 lbs. of roots from seed purchased from us. ¼ lb. 15c. Lb. 30c. 5 lbs. or more 20c. per lb.

Red Globe Mangel.—This variety is valuable for earliness and smooth, symmetrical, globe shaped roots. The roots are about eight inches in diameter. ¼ lb. 15c. Lb. 30c. 5 lbs. or more at 20c. per lb.

BROCCOLI.

This is a plant bearing heads resembling those of the cauliflower, but more hardy and gives excellent results in cool northern localities. We do not consider it of any value in warm or dry localities, nor so fine in quality as the cauliflower.

Purple Cape.—Heads nearly as large as those of the cauliflower; close, solid curl of a brownish-purple color. Pkt. 10c. Oz. 35c. $\frac{1}{4}$ lb. \$1.00. Lb. \$3.50.

BRUSSELS SPROUTS.

Brussels Sprouts are highly esteemed for boiling during the late fall and winter months. The sprouts resemble miniature cabbages growing closely on the stalk of the plant, a small head, or sprout, being formed at each leaf-joint.

Perfection.—The plants grow about two feet in height and the stems are thickly set with the sprouts which grow one or two inches in diameter. In the larger sprouts only the small, hard center is used, the loose leaves being trimmed away. Pkt. 5c. Oz. 15c. 2 oz. 25c. $\frac{1}{4}$ lb. 45c. Lb. \$1.60.

Paris Market.—This is a half-dwarf strain, not so tall as the preceding, but bearing a large crop of handsome, round hard sprouts of the finest quality, crowded together on the stalk. Pkt. 5c. Oz. 15c. 2 oz. 25c. $\frac{1}{4}$ lb. 45c. Lb. \$1.60.

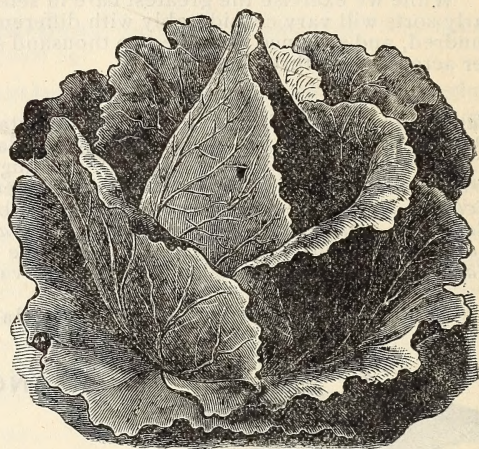

CABBAGE.—(Kopf Hohl.)

CULTURE.—With a proper selection of varieties and a succession of planting this standard vegetable may be had in constant supply throughout the year in all parts of our country. In Middle and Northern States seed may be sown in hot-beds and cold frames during February and March; when the plants are well started, harden them off by giving plenty of fresh air, and they will be ready to plant in garden or field in April. By sowing seed of the early varieties in September and October and wintering the plants in cold frames, stocky, hardened plants may be had which can be set out the last of March. For fall and winter supply we sow seed in beds outdoors in June, transplanting to the field during July and the early part of August. Seed should be sown very thinly in shallow drills so that the young plants will grow strong and stocky—as slender, long-stemmed plants are of little value.

Selected Strain Early Jersey Wakefield.—This is the very best conical headed sort on the market, it is extra early and always sure to form fine solid heads.

The old reliable; unfortunately the great demand for this sort has brought upon the market large quantities of coarse and inferior stock, which has tended to diminish the popularity of the sort; but when pure home-grown stock, such as we offer, is used, it cannot fail to give perfect satisfaction. Pkt. 5c. Oz. 25c. $\frac{1}{4}$ lb. 60c. Lb. \$2.00.

Early Summer.—This is without exception the best large Early Flat Head Cabbage. It is about two days later than the Jersey Wakefield and being over double the size makes it more desirable. Gardeners will find it a very profitable variety. Our stock is of the very best. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 50c. Lb. \$1.75.

**EARLY JERSEY WAKEFIELD.**

All Seasons.—This is a splendid cabbage, suitable for fall and spring sowing, has large flat handsome heads and matures rapidly. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 50c. Lb. \$1.75.

Succession.—This is a splendid cabbage suitable for fall or spring sowing, has large flat handsome heads and matures rapidly. Plant Succession for main crop. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 60c. Lb. \$2.00.

Premium Late Flat Dutch.—This variety is largely grown for late or main crop, being the favorite market variety. Heads very large, solid and broad, with flat tops; of fine flavor and quality, very short stems. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 50c. Lb. \$1.50.

CABBAGES.—15 Well-known Standard Varieties.

	Per oz.	$\frac{1}{4}$ lb.	Per lb.

<i>Red Dutch, or Pickling.</i>	15	50	1 75

CABBAGE.—CONTINUED.

Burpee's Original Surehead Cabbage.—Produces large, round, flattened heads of the Flat Dutch type, and is remarkable for its certainty to head. It is all head, and sure to head, even under unfavorable conditions. The heads are remarkably uniform, very hard, firm and fine in texture, and ordinarily weight from 10 to 15 pounds each. It is very sweet flavored, has but few loose leaves, keeps well, is good for shipping, and is just the variety and quality to suit market gardeners, farmers and all lovers of good cabbage. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 60c. Lb. \$2.00.

BURPEE'S SUREHEAD.

An Illustration and Directions for Culture are Printed on each Package of Seed Sold by us.

CARROTS.—(Mohre).

1 oz. to 150 ft. of drill. $2\frac{1}{2}$ lbs. to an acre.

CULTURE.—Follow directions given for Beets and Parsnips as there is no difference in the method of cultivating these roots. For early crop sow in March, for late crop in May or June.

Earley Scarlet Horn.—Small but early. Best for forcing. Pkt. 5c. $\frac{1}{4}$ lb. 25c. Lb. 70c.

Danvers' Half-Long Stump Rooted.—A new variety of decided merit; rich in color and of handsome shape. Pkt. 5c. $\frac{1}{4}$ lb. 25c. Lb. 70c.

Danvers' Half-Long Pointed Root.—Early and very beautifully shaped; very rich in color and best for main crop. It is worthy of a fair trial. Pkt. 5c. $\frac{1}{4}$ lb. 25c. Lb. 75c.

Improved Long Orange.—Deep orange color, long, smooth, most popular for general crop. Pkt. 5c.—10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

St Vallery, or New Intermediate. Pkt. 5c. $\frac{1}{4}$ lb. 25c. Lb. 70c.

CELERIAC OR TURNIP ROOT CELERY.

New Large Smooth.—A new and quite distinct sort, the roots being very smooth, large and round. Roots may be cooked and sliced, and eaten with vinegar. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 40c.

CORN SALAD.—(Ackersalat).

3 oz. of seed to 100 ft. of row.

Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

Special Prices on any one kind of Seed in large quantities.

CELERY.—(Sellerie).

1 oz. to 1000 plants. 10 to 15 oz. to the acre.

CULTURE.—Celery seed may be sown during March or April in hot-beds. From middle of April or May seed may be sown out-doors, for which purpose select a warm location, and light rich soil. Thin until there is a clear space between the plants. When the plants are six inches high, draw them, trim tops, place them six inches apart in trenches. Shade until they begin to grow, and, if dry, water. Trenches should be three feet apart, four inches deep, and nine inches wide. Incorporate plenty decayed manure at bottom of the trenches to a further depth of one foot, which may be done with a spade. Moist land, well enriched will give the best results. After September 1st, continue to draw on both sides rich pulverized soil to the stems, at intervals, as the growth of the plants indicates. This should not be done during rainy or hot weather. Keep soil from the heart of the plants. At the end of October bury the whole in dirt, and dig up as desired for use.

Improved White Plume.—An early self-blanching variety, very popular for fall and early winter use. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 50c. Lb. \$1.75.

Pink Plume.—Similar in every respect to the White Plume except in color, which is a very beautiful and delicate shade of pink; is solid, crisp and tender. Oz. 25c. $\frac{1}{4}$ lb. 50c. Lb. \$2.00

Dwarf Golden Heart.—Very solid, an excellent keeper and of fine nutty flavor, the heart, which is large and full is of a waxy, golden yellow, rendering it very showy for either market or private use. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 40c. Lb. \$1.50.

Giant Pascal.—The stalks are very large, thick, solid, crisp and of rich nutty flavor, free from any taste of bitterness. It blanches very easy and quickly, and retains its freshness a long time after being marketed. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 50c. Lb. \$1.50.

Gold Self-Blanching.—A most valuable variety which partakes somewhat of the celebrated "White Plume" inasmuch as it does not require such high "banking-up" as the ordinary sorts to be fit for the table. It simply needs a slight earthing-up or handling. It is of a beautiful waxy golden color, very solid and of rich nutty flavor. Pkt. 5c. Oz. 30c. $\frac{1}{4}$ lb. \$1.00. Lb. \$3.00.

GOLDEN SELF-BLANCHING CELERY.

Giant Golden Heart.—Same as the Dwarf, only the stalks are larger. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 50c. Lb. \$1.50.

CAULIFLOWER.

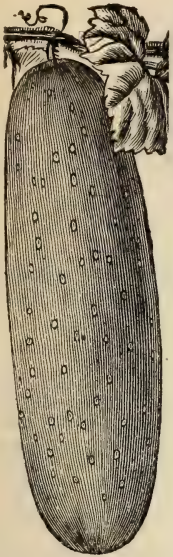

CULTURE.—Cauliflower is grown in the same manner as cabbage, but requires cool, moist weather and well enriched soil to attain perfection. It is highly valued for the mild delicate flavor of the white heads.

Early Snowball.—Extensively advertised, this has deservedly attained great popularity, and is now extensively planted. Under favorable conditions nearly every plant will make a fine, solid head of good size. It is of dwarf habit valuable both for early and late crops. Half sized packet 15c. Pkt. 25c. $\frac{1}{4}$ oz. 75c. $\frac{1}{2}$ oz. \$1.25. Oz. \$2.50.

CELERY PLANTS.

We are prepared to quote Celery Plants at the proper time.
We arrange to have all the Standard Varieties.

WRITE FOR PRICES.

CUCUMBERS.—(Gurke).

1 oz. to 50 hills. 1 to 2 lbs. to an acre.

CULTURE.—For the growth of cucumbers hills are raised, standing five feet apart. Quite rich, sandy soil is best. If necessary enrich the hills with a mixture of sandy soil and strong rotten manure. For early use, plant in May; for pickling, plant in June or July. Eight or ten seeds should be allowed to each hill as the young plants are often destroyed by bugs.

Soon as the plants attain vigor, thin them, leaving the three most promising, if practicable water during the drought, keep soil loose and free of weeds.

Early White Spine.

One of the best sorts for table use. Vines vigorous, fruiting early and abundantly; fruit uniformly straight and handsome, dark green, with a few white spines; flesh tender and of excellent flavor. In this country this variety is used more, perhaps, than any other for forcing under glass. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 50c. Lb. \$1.75.

Arlington.—A selection from the White Spine, being more pointed at each end. The young fruits are unusually crisp and tender, and are of very dark green color, so that the variety is considered by many to be the best for small pickles. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 50c. Lb. \$2.00.

Cool and Crisp.—A strain of White Spine somewhat like the Arlington, but larger and less symmetrical. The flesh is peculiarly crisp and tender, and it is one of the very best for table use. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 50c. Lb. \$1.65.

London Long Green.—Is the standard late sort, quite crisp, and of good size; it is not so early as either the Spine or Frame, but is more desirable for a late crop. It is the variety also grown very extensively in New Jersey and other sections for pickling, and for that purpose should not be planted until late in July or early in August, and when of a proper size picked and put in salt and water. Oz. 15c. $\frac{1}{4}$ lb. 50c. Lb. \$2.00.

Jersey Pickling.—The best general crop pickle. Pronounced by growers to be a perfect pickle in every respect, being very productive; a deep green color. It has no rival. Pkt. 5c. $\frac{1}{4}$ lb. 50c. Lb. \$2.00.

Gerkin or Burr.—Used only for pickling. Pkt. 5c. Oz. 15c.

The crop of Cucumber seed this season was almost a complete failure, hence the prevailing high prices. Vine seed growers never experienced such a disastrous season as the one just passed.

ENDIVE.—(Endivien).

1 oz. to 200 ft. of drill. 3 lbs. to an acre.

CULTURE.—June or July select a bed of good soil, drill fifteen inches apart, sow seed and cover lightly. The plants should not stand closer than twelve inches. Keep the earth to the stems, destroy weeds and hoe liberally.

To blanch the plants and destroy bitterness, when the leaves attain sufficient length, tie them closely at the top, while perfectly dry, for the purpose of excluding light and moisture, or cover with flower-pots. After fourteen days they will be ready for use.

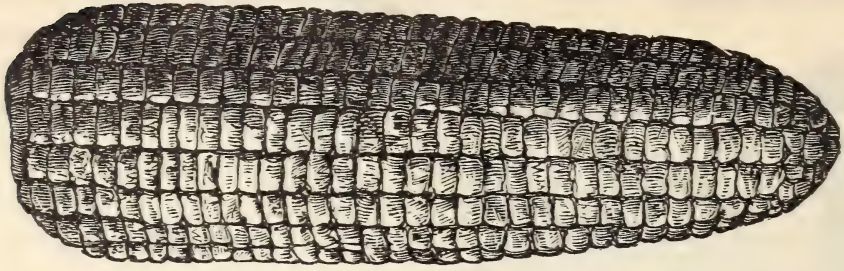

Extra Green Curled.—It is the best. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 40c. Lb. \$1.25.

EGG PLANT.—(Eierfrucht).**NEW YORK IMPROVED EGG PLANT.**

CULTURE.—Sow in hot-beds, or in box or pots for indoor cultivation, early in spring. The plants being very tender must be sheltered from frost, but exposed so far as practicable to the sun and air. Early plants will be ready to transplant in May.

Select light, rich soil, set plants distant five feet each way and keep well cultivated. Where the plants are set, the soil should be highly enriched by incorporating chicken manure some weeks previous.

New York Improved Large Purple.—Oval shape, thornless, dark purple color and rich flavor. Our stock of Egg Plant will be found very superior wherever used. Pkt. 10c. Oz. 25c. $\frac{1}{4}$ lb. 85c. Lb. \$3.00.

CORN.—(Korn).**STOWELL'S EVERGREEN SWEET CORN.**

New Early Champion.—The best early sweet corn. Ear 5c. Doz. 50c. Qt. 20c. Pk. \$1.00. Bu. \$3.50.

Adams' Extra Early.—The hardest and earliest variety for the table use, it can be planted earlier than any other, but is not a sweet corn; white, indented grains and short ears. Ear 5c. Doz. 25c. Pt. 10c. Qt. 15c. Bu. \$2.50.

Stowell's Evergreen.—See illustration engraved from a photograph of an ear of our improved strain. The seed which we offer is free from glaze and flint, and has been grown completely isolated from all other varieties. Its qualities will not be found in the Stowell's Evergreen Sweet Corn as usually sold, which has deteriorated generally both in quality and productiveness. For canning purposes the Improved Stowell's Evergreen Sweet Corn will prove most satisfactory; its large ears, with long, slender grains, make the most salable canned corn. Doz. 50c. Pt. 10c. Qt. 20c. Pk. \$1.00. Bu. \$3.75.

BORE COLE OR KALE.

(Sparael Kohl).

1½ to 2 lbs. to an acre.

CULTURE.—Sow in drills or broadcast, in the fall or spring. It will mature without further attention unless weeds get the start, when the latter must be removed and the earth loosened.

Curled German.—Curly, dwarf, hardy and a rapid grower. Pkt. 5c. ¼ lb. 15c. Lb. 50c.

KOHL RABI.—(Kohl Rabi).

1 oz. to 200 feet of drill. 1½ lbs. to an acre.

CULTURE.—Sow in April in rows eighteen inches apart, thinning out to eight inches between plants.

Early White Vienna.—This forms a bulb above ground, and its flavor mingles the peculiarities of the cabbage and turnip. Pkt. 5c. Oz. 20c. ¼ lb. 50c. Lb. \$1.50.

Adams' Early.—A splendid early variety; largely grown for early market. Ear 5c. Doz. 25c. Bu. \$2.50.

Mammoth Late.—This produces the largest ear of any, a single ear sometimes weighing two to three pounds. It ripens a little later than the Evergreen, with larger cobs, the kernels being flatter, not horse-tooth shape. Doz. 50c. Pt. 10c. Qt. 20c. Pk. \$1.00. Bu. \$3.75.

Country Gentleman.—A new corn of merit and desirable for family use. The grains are irregular, compact and sweet. Doz. 50c. Pt. 10c. Qt. 20c. Pk. \$1.00. Bu. \$3.75.

Stabler's Extra Early.—A new variety, of larger size than usual for the early kinds. It is remarkable for sweetness and earliness. A desirable canning variety. Doz. 50c. Pt. 10c. Qt. 20c. Pk. 75c. Bu. \$3.75.

LEEK.

Broad London or Large American Flag.—Best American-grown seed. Pkt. 5c. Oz. 15c. ¼ lb. 35c. Lb. \$1.25.

LETTUCE.—Lattich).

1 oz. to 3000 plants. 3 lbs. to an acre.

CULTURE.—Sow in hot-beds or the open ground during April and May for summer supply. Plants may be grown on a temporary bed and transplanted; or the seed may be sown where the lettuce is to mature. For a permanent bed, select rich light soil, spade deeply, incorporate manure and lay off in drills two feet apart. Destroy weeds and hoe often. Seeds may be sown in August and September, and plants treated as directed for cabbage plants, in which case a covering of straw will prove very beneficial.

SALAMANDER LETTUCE.

Salamander.—*B. S.*—Compact, tender heads, resisting summer heat. Oz. 15c. $\frac{1}{4}$ lb. 35c. Lb. \$1.00.

New Iceberg.—Quick growing heads, hard and handsome. Tender and true. There is no handsomer or more solid cabbage lettuce in cultivation—in fact, it is strikingly beautiful. The large, curly leaves which cover the outside of the head are of a bright, light green. The unusually solidity of the heads is insured by the large white main ribs of the leaves, each of which curving strongly into the centre, acts like a truss, making it impossible for the leaves to open outward and expose the centre, which consequently, is thoroughly blanched. It matters not whether in the early spring or the hottest days of summer, the leaves are always crisp and tender. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 35c. Lb. \$1.25.

Philadelphia Butter.—A very early lettuce, excellent for forcing. Produces large heads of excellent quality; one of the best for market gardeners. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 35c. Lb. \$1.25.

Philadelphia Early White Cabbage.—Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 30c. Lb. \$1.00.

Early Curled Simpson Lettuce.—Heads are a yellowish green, are compact mass of curly leaves, very tender. Pkt. 5c.—10c. Oz. 15c. $\frac{1}{4}$ lb. 35c. Lb. \$1.00.

Golden Queen.—Popular for forcing. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 30c. Lb. \$1.00.

Improved Hanson.—One of the finest. Beautiful fringed head. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 35c. Lb. \$1.25.

California Cream Butter Lettuce. Outside leaves are a medium green color, and inside is folded a solid head of rich, creamy yellow color. It is considered by the growers one of the best in cultivation. Oz. 15c. $\frac{1}{4}$ lb. 35c. $\frac{1}{2}$ lb. 60c. Lb. \$1.00.

Defiance Summer.—Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 35c. Lb. \$1.25.

Big Boston.—Identical in color, shape and general appearance as the Boston Market Lettuce, but double the size. It is about one week later in maturing, but its solidity and greater size of head will make it a most valuable sort, desirable either for cold frames or open ground planting. It heads up well all seasons of the year, and is of crisp, tender quality. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 35c. Lb. \$1.00.

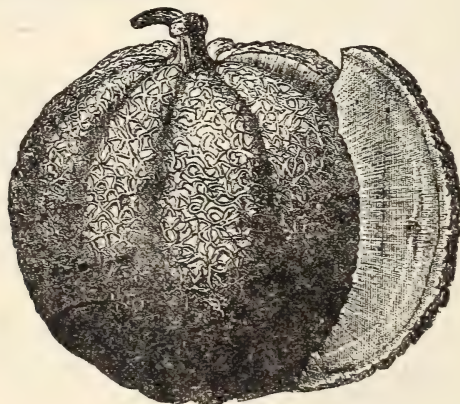

Early Prize Head.—Large, loose heads, tinged with brown, fine flavor. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 30c. Lb. \$1.00.

Boston Market or Tennis Ball.—This variety is used specially for green house and hot-bed culture, because it can be planted very close. It grows very compact, fair size, heads slightly tinged with red on edge of leaves. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 35c. Lb. 90c.

Grand Rapids.—This is a very large, thin-leaved, curly-head lettuce. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 35c. Lb. \$1.00.

CANTALOUPE.—Zucker Melone).**ACME OR BALTIMORE CANTALOUPE.**

A first-class melon; has size, form, beauty and rich in flavor. Why grow a poor crop when a small outlay for good seed will assure a splendid crop of choicest fruit, which will command the highest prices and ready sales? Our seed this year is from the best crop we ever grew, and with our seed your crop may be equally as good. The best of all for market purposes. Our seed is from the finest stock known, and has always given satisfaction. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 25c. Lb. 85c.

MUSK MELON OR CANTALOUPE.**EXTRA EARLY HACKENSACK.**

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
<i>Netted Gem, or Rocky Ford</i>	\$0 10	\$0 30	\$1 00
<i>Paul Rose, or Petoskey</i>	10	30	90
<i>Burpee's Champion Market</i>	10	30	1 00
<i>Hackensack, or Turk's Cap.</i> Large, round; flattened, green flesh.....	10	30	1 00
<i>Extra Early Hackensack.</i> 10 days earlier than the preceeding.....	10	30	1 00
<i>Acme, or Baltimore,</i> Oblong pointed; light green flesh.....	10	25	85
<i>Boston Mango.</i> Useless as fruit, but the best for " <i>Mangoes</i> ."	10	25	85

In regular-sized Packets, each of the above, 5 cents per packet.

WATERMELON.—(Wassermelone).

CULTURE.—Prepare hills in the same manner as for Musk Melons, but to accommodate the larger growth of vine the hills should be eight to nine feet apart each way. Plant the seed as soon as the temperature remains above sixty degrees all night, and when vines are well started thin out to one or two plants in a hill. When vines are three feet in length, pinch off the tips to cause them to throw out laterals.

According to the size seeds, a "packet" contains from 60 to 140, an ounce from 240 to 600. Use four ounces of seed to 100 hills; three pounds per acre.

Burpee's Cuban Queen.—This magnificent melon from the West Indies was first brought prominently before the public by us in 1881. The skin is beautifully striped, dark and light green. The flesh is bright red, remarkably firm, luscious, and the rind is quite thin for so large a melon. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

If ordered by express, deduct 10 cents per pound.

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
<i>Kolb Gem.</i> Very large; flesh red, a good shipping sort. Very popular in the South.....	\$0 10	\$0 20	\$0 60
<i>Sweet Heart</i> Oval form; mottled light green skin; red flesh.....	10	20	60
<i>Duke Jones.</i> A famous new Southern melon, introduced in 1895.....	10	20	60
<i>Florida Favorite.</i> An oblong melon of fine flavor.....	10	20	60
<i>Girardeau's New Favorite.</i> An improved Florida favorite.....	10	20	60
<i>Pride of Georgia.</i> Round in shape; skin striped.....	10	20	60
<i>Seminole.</i> Similar to Jordan's Gray Monarch.....	10	20	60
<i>Ice Cream, or Peerless.</i> True white seeded; oblong, luscious.....	10	20	60
<i>The Boss.</i> A fine, oblong melon; of small size; good flavor.....	10	20	60
<i>Kentucky Wonder.</i> A popular market melon in the West.....	10	20	60
<i>Striped Gypsy, or Georgia Rattlesnake.</i> A large, oblong melon.....	10	20	60
<i>The Jones.</i> A great favorite in the South; rich flavor.....	10	20	60
<i>Rudy-Gold.</i> Flesh yellow, marked with red; not recommended.....	10	20	60
<i>Colorado Preserving.</i> The best for citron preserves.....	10	25	75

Each of the above Watermelons, 5 cents per packet.

ONIONS.—(Zwiebel).

CULTURE.—To raise Onion Sets, during March or April select good soil and mark shallow drills one foot apart, along which sow seeds thickly. Keep the beds free from weeds. In July, the bulbs will be the size of marbles, when they are taken up and spread thinly over a floor, securely protected from dampness, and exposed to the air.

To raise large Onions, select a bed of rich soil, work it deeply and add decayed manure plentifully, level the bed and mark drills one inch deep and one foot apart. Place the roots of the sets about six inches apart in these drills. Keep the soil loose and free of weeds.

White Silver Skin.—The leading sort of white onion. Skin is of a beautiful, clear white color; flavor mild, and a most excellent keeper. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 50c. Lb. \$1.75.

Australian Brown.—Nearly round, medium size, with skin of a deep amber brown, extremely hard and firm, of fine flavor and will keep almost indefinitely. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 35c. Lb. \$1.25.

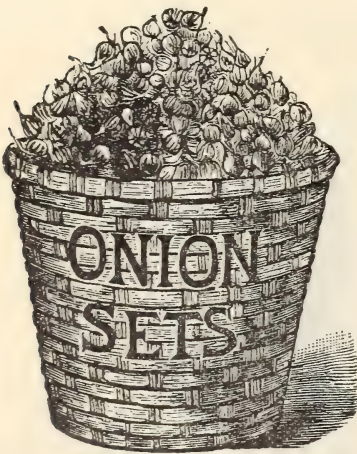

Yellow Globe Danvers.—Yellow skin, mild fine flavor, and very hardy. Oz. 25c. $\frac{1}{4}$ lb. 35c. Lb. \$1.25.

White Portugal.—Pure white skin. Oz. 20c. $\frac{1}{4}$ lb. 50c. Lb. \$1.75.

Strasburg or Yellow Dutch.—The most popular variety for sets. Sets grow round and plump with bright yellow skin, flesh pure white, mild flavor, and an excellent keeper. Oz. 15c. $\frac{1}{4}$ lb. 35c. Lb. \$1.25.

ONIONS.—CONTINUED.

Prizetaker.—This is the large beautiful onion that is seen every fall offered for sale at the fruit stores in Baltimore and other large cities. They are a rich straw color and of enormous size. Although of such large size it is very hardy and an excellent keeper. The flavor is mild and delicate, making the Prizetaker a favorite variety for salad. Oz. 20c. $\frac{1}{4}$ lb. 40c. Lb. \$1.50.

CHOICE ONION SETS.

Prices on application.

OKRA OR GUMBO.

Dwarf Okra.—Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

PARSNIPS.—(Pastinate).

1 oz. will sow 100 ft. of drill, 5 lbs. to an acre.

CULTURE.—Deep mellow soil is necessary for the full development of the Hollow Crown Parsnip, because the truest type of Hollow Crown will show a high Crown when grown in stiff soil.

Sow as early in the spring as the weather will permit, in drills 15 in. apart, covering the seed $\frac{1}{4}$ of an inch deep; when well-up, thin out to 5 or 6 inches apart in the rows. Parsnips are improved by frost, and it is a usual custom to take up in the fall a certain quantity for winter use, leaving the rest in the ground until spring, to be dug as required. Aside from the value of the parsnip as a table vegetable, it is also one of the best roots for cultivation for farm purposes, furnishing a very nourishing food particularly adapted to and relished by dairy stock.

Hollow Crown Sugar.—This is the finest stock in cultivation. Deep hollow crown, delicate flavor, tender and smooth. (See cut). Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 15c. Lb. 40c.

PEPPERS.—(Pfeffer).

4 oz. to an acre.

CULTURE.—In March or April sow in a hot-bed or in a box for in-door attention, exposing the plants to the light, or air, as much as practicable. In six weeks they will be ready for transplanting. Select good soil and set the plants twelve inches apart in rows which should be two feet apart. Cultivate with hoe, and draw soil to the stems. Seed may be sown outdoors in May.

Ruby King.—Beautiful red color, mild and pleasant in flavor, very productive, can be used as a salad, and the best sort for Mangoes. Pkt. 5c. Oz. 25c. $\frac{1}{4}$ lb. 60c.

Bell or Bull Nose.—Large ribbed acid; best for pickling. Pkt. 5c. Oz. 25c. $\frac{1}{4}$ lb. 60c.

Long Red Cayenne.—Red pods, small and acid. Pkt. 5c. Oz. 25c. $\frac{1}{4}$ lb. 60c.

PARSLEY.—(Petersille).

CULTURE.—Seed should be sown thinly in drills as early in the spring as the soil can be dug in fine loose condition, as it germinates best during cool moist weather. When well started thin out or transplant to stand six inches apart in the row. The dwarf, moss-curved varieties make beautiful edgings for the garden beds when planted along the walks, and furnishes ornamental foliage for garnishing as well as seasoning for table use. Roots may be taken up and planted in boxes or flower pots in the fall for winter use and placed in a sunny window in the kitchen. As plants run to seed early in the spring the second year, fresh plantings should be made each season. A "packet" contains about 3000, and an ounce 15,000 seeds. Use one-half ounce to 100 feet of drill.

Plain or Single.—Plain leaves, excellent flavor. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 50c.

Fine Double Curled.—Fine, dwarf, crimped leaves. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 50c.

Extra-Curled Dwarf or Emerald.—This is a most beautiful and valuable variety. The moss-like leaves, of a handsome bright green color, are finely crimped and curled. For garnishing, no variety is more attractive. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

Extra Dark Moss Curled.—This is very ornamental in growth, more so than many plants grown for decorative purposes. The leaves are of a peculiar, extra dark-green color. It is very productive, and from the densely curled character of its leaves a quantity of green seasoning or garnishing can be gathered in less time than with the more open-leaved varieties. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

PUMPKIN.—(Rurbis).

10 lbs. to an acre.

CULTURE.—Plant in May in hills eight feet apart. Allow ten seeds to each hill, as bugs often destroy the young plants, but never allow more than two or three healthy plants to remain in each hill.

Connecticut Large Field.—Very prolific; one of the best for stock. Qt. 15c. Pk. 75c. Bu. \$2.50.

Sweet Potato.—One of the best pie and cooking pumpkins, of good size, slightly ribbed, skin of creamy white, dry and fine grained. Keeping well until late in the spring. $\frac{1}{4}$ lb. 25c. Lb. 60c.

Cushaw or Crookneck.—Productive; color light cream, sometimes lightly striped. Pkt. 5c. $\frac{1}{4}$ lb. 25c. Lb. 70c.

AROOSTOOK SEED POTATOES.

10 bushels to the acre.

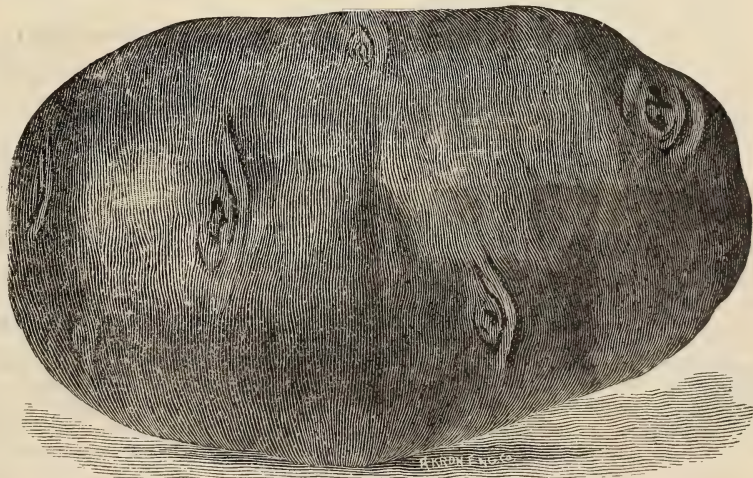

Plant as early as the ground can be prepared in a rich, light soil 1 ft. apart in rows 3 ft. apart, cutting the potato not more than three pieces to each potato. The ground should be thoroughly well manured and the potato covered about 3-in. deep. Potatoes are subject to so many ailments that we cannot go into details describing each one. We are, however, well acquainted with nearly all the conditions of blight, rust or insect pests which the potato is inflicted with, and should be pleased to give you the benefit of our advice, either personally or by letter, on receiving description of your trouble. In a general

way we are recommending Bug Death as the best insecticide for potatoes. We have also in stock at all times Slug-Shot, Paris Green, the different preparations of Whale Oils, etc.

Choice Stock Grown Especially for Seed.—Prices subject to change without notice.

Long experience in the seed business justifies us in stating that with no seed-stock is one at the mercy of the dealer so much as with seed potatoes. You must depend to a great extent on the reliability of your dealer. In this locality the farmer demands a seed-stock grown in the extreme north, and unless the stock itself is healthy, your entire crop is liable to scab or other diseases which will ruin the entire field. The best potatoes in the world come from Aroostook county, Maine, and we have contracted this year for our main stock to be grown there. Get our prices before you buy.

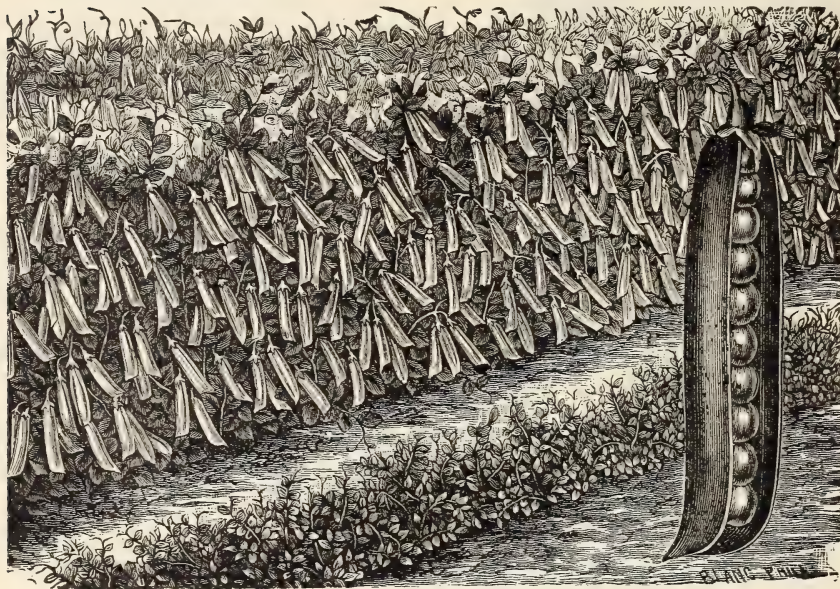

A few of the standard varieties:—New Queen, Beauty of Hebron, Early Norther, Early Harvest, Green Mountain, Early Rose.

PEAS.

ESPECIALLY FOR SEED PURPOSES.

On account of the very short crop in some varieties of Peas, prices are subject to change without notice.

FIRST AND BEST PEAS.

PEAS.—(Erbsen).

Add 15c. per quart extra if to be sent by mail.
1 qt. for 100 ft. of drill, 2 bushels to the acre.

CULTURE.—For early crop sow in February or March, as soon as the ground can be worked, and in succession as desired.

Rich soil is the best. Make double rows, eight inches apart, then allow a clear space three feet or more between these and the next rows. Drop peas along these rows five inches apart, and between the rows plant brush to which the vines will cling. According to the growing tendencies of the different varieties, the brush or any other artificial support may be long or short.

For market crop sow in single rows three inches deep, and two or three feet apart, according to variety.

First and Best.—It is very profitable for the gardener and shipper because it is very early, ripens uniformly, so that all the pods may be picked within seven weeks from the time of planting, and that at one picking. No brush or other support is required, as they seldom, under any circumstances grow to exceed 20 inches in height. Pt. 15c. Qt. 25c. Pk. \$1.50. Bu. \$5.00.

Extra Early Alaska.—The earliest blue pea. The dark green color of the pods makes it extremely desirable as it can be carried long distances without losing color, which quality, combined with its earliness and uniformity of ripening, makes it a most desirable pea for market gardeners. Height two feet. Pt. 15c. Qt. 25c. Pk. \$1.50. Bu. \$5.00.

EXTRA EARLY WRINKLED PEAS.

Nott's Excelsior.—The very best short vine. Wrinkled extra early pea. Vines are more vigorous and taller than the American Wonder, and the pods are one-third larger, containing often 6 to 8 large peas, closely compacted together, and for sweetness and quality it has no superior. Pt. 15c. Qt. 25c. Pk. \$1.75. Bu. \$6.50.

American Wonder.—This variety stands unrivaled in point of productiveness flavor and quality, and is without exception the earliest wrinkled pea in cultivation. It is of dwarf and robust habit, growing from ten to fifteen inches high, and produces a profusion of good sized and well filled pods of the finest flavor. Dry peas, medium size, wrinkled and flattened, pale green. Requires liberal fertilizing. Pt. 15c. Qt. 25c. Pk. \$1.75. Bu. \$6.50.

PEAS.—CONTINUED.

PREMIUM GEM PEAS.

WRINKLED VARIETIES.

Premium Gem.—This variety is nearly as early as the American Wonder, and the vine is decidedly larger, growing to a height of from twelve to fifteen inches, and bearing an immense crop of pods, which are larger and invariably well filled with peas of best quality. The dry peas are green, large wrinkled, often flattened. Pt. 15c. Qt. 25c. Pk. \$1.75. Bu. \$6.50.

Pride of the Market.—A famous variety, producing pods as long as the Stratagem, and very productive; grows from eighteen inches to two feet high and is of fine flavor; is one of the best and most popular varieties for either market or private growing. Pt. 15c. Qt. 25c. 4 qt. \$1.00. Pk. \$1.75. Bu. \$6.00.

Telephone.—A luscious wrinkled pea-pods, large size, and peas large, excellent quality, an enormous cropper, grows four feet high. Pt. 15c. Qt. 25c. Pk. \$1.50. Bu. \$5.50.

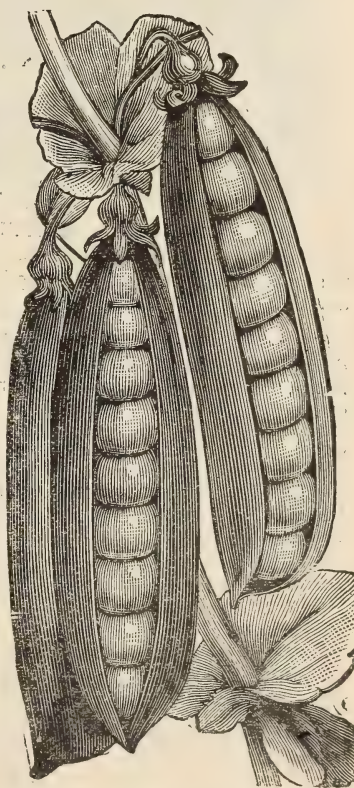

Yorkshire Hero.—A splendid and popular wrinkled green marrow pea, very prolific, exceedingly luscious, and an abundant bearer; grows about two and a half feet high. Pt. 15c. Qt. 25c. Pk. \$1.25. Bu. \$5.00.

Champion of England.—Wrinkled.—A green wrinkled variety, famous for its delicious flavor. Consider it one of the finest varieties for family use, and will follow any of the second early varieties in ripening. Pt. 10c. Qt. 20c. Pk. \$1.00. Bu. \$4.00.

GENERAL CROP.

Dwarf White Marrowfat.—Height three and a half to four feet. Peas large, standard variety. Pt. 10c. Qt. 15c. Pk. 75c. Bu. \$2.50.

Black Eye Marrowfat.—Pt. 10c. Qt. 15c. Pk. 75c. Bu. \$2.50.

TELEPHONE.

RADISH.

(Rettig).

PHILADELPHIA WHITE BOX.

1 oz. will sow 100 ft. of drill, 9 lbs. will sow an acre.

CULTURE.—Select light sandy soil; spade deeply and manure well. For early crop, sow in hot-beds in February or March. For main crop, sow at intervals from early spring until last of September, in deep, rich soil. Broadcast sowing is allowable, but drilling is more professional, however, radishes do well by either method. Thin when they crowd, or the crop will be imperfect. They may be drawn after a few weeks growth.

EARLY VARIETIES.

Philadelphia White Box.—Has a very small top, color white, turnip shape, equally valuable for growing under glass or in opening ground. Pk. 5c. Oz. 10c. $\frac{1}{4}$ lb. 25c. Lb. 75c.

Scarlet Globe.—Very early for forcing; globe form and beautiful. Try it in your hot-beds. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 25c. Lb. 70c.

Early Scarlet Turnip (White Tipped).—Early, fine grain and flavor; round, with white tip. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

Early Scarlet Turnip.—Small, round, mild and crisp, a standard early sort. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

Deep Scarlet Turnip.—Very early and a good forcing variety. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

Early Long Scarlet.—Short top, long deep scarlet roots, fine flavor. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

French Breakfast.—A quick growing, oval-shaped radish, light color and white tip. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 70c.

Long Brightest Scarlet.—This is an improvement of the old time long scarlet, being somewhat thicker and not quite so long; color bright scarlet, white tip, is very early, mild flavored, fine for forcing or oat-door planting. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 70c.

Long White Vienna or Lady Finger.—This in shape resembles the long scarlet; color snow white, it is of very rapid growth; and remarkably crisp, brittle and tender. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 70c.

SUMMER VARIETIES.

White Strasburg.—Large white radish, which stands summer heat; handsome shape and pure white color. (See cut). Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

New Chartier.—The color at top is crimson, running into pink at middle, and thence downward to pure waxy white. It will attain a very large size before it becomes unfit for use. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

Chinese Winter Rose.—Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

Round Black Spanish Winter.—Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

Long Black Spanish.—Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 20c. Lb. 60c.

WHITE STRASBURG RADISH.

SPINACH.

(Spinat).

**BLOOMSDALE SAVOY LEAVED SPINACH.**

10 to 15 lbs. to acre.

CULTURE.—Select strong soil, spade deeply and manure. Sow broadcast or sprinkle seed freely in shallow drills one foot apart; but plants should never stand closer than six inches. The seed lies two weeks before sprouting, and good seed often spoils in the ground when circumstances do not favor germination.

Long Standing.—The best for spring sowing, because it will stand longer before running to seed than any other variety. $\frac{1}{4}$ lb. 10c. Lb. 25c.

Bloomsdale Savoy.—Well known and popular with market gardeners. The best and most profitable. Very curly. (See cut.) $\frac{1}{4}$ lb. 10c. Lb. 25c. 10 lbs. or over 20c.

SQUASH OR CYMBLING.

(Kurbis).

**EARLY WHITE BUSH SQUASH.**

Bush sorts, 1 oz. for 50 hills. Bush varieties, 5 to 6 lbs., and running varieties, 3 to 4 lbs. in hills for an acre.

CULTURE.—After the weather is settled and warm, plant in hills five to eight feet apart. Rich soil is best, but if necessary the hills alone may be enriched. Allot eight seeds to a hill, but do not allow more than three vigorous plants to remain at each hill. Keep soil loose and free of weeds. Water if drought prevails.

**BOSTON MARROW SQUASH.**

Early White Bush Scalloped or Patty Pan.—The best for early market use. Preferred for table. (See cut.) Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 25c. Lb. 75c.

Summer Crookneck.—Early, fine flavor; a desirable table sort. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 25c. Lb. 75c.

Winter Crookneck.—Flesh red, fine flavor; largely grown for winter use. Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 25c. Lb. 75c.

Boston Marrow.—A splendid winter squash of good keeping qualities. Flesh bright orange, fine grain and flavor unsurpassed. It is oval-shaped and thin skin of bright orange color. For pies it is equal to the best pumpkin. (See cut.) Pkt. 5c. Oz. 10c. $\frac{1}{4}$ lb. 25c. Lb. 90c.

Hubbard.—A desirable sort, suitable for winter use. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 3c. Lb. \$1.10.

SALSIFY OR OYSTER PLANT

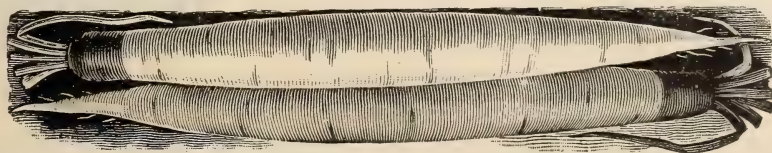

(Bocksbart).

6 to 8 lbs. to an acre.

CULTURE.—Sow early in spring, in drills fifteen inches apart; cover with fine soil one and a half inches deep; thin to six inches apart. As soil is strong and inclines to depth and lightness, it proportionately is adapted to salsify. As the leaves resemble grass, be careful they are not mistaken in weeding. Salsify keeps over winter like parsnips.

Sandwich Island Mammoth.—A new and improved Salsify. Roots are very large and superior; grown extensively for our large city markets; much superior to other sorts. (See cut.) Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 35c. Lb. \$1.15.

Large White.—A very good variety for general use; handsome shape, large and smooth. Pkt. 5c. Oz. 15c. $\frac{1}{4}$ lb. 35c. Lb. \$1.00.

**MAMMOTH SANDWICH ISLAND SALSIFY.**

TOMATO.

(Liebesapfel).

NEW STONE TOMATO.—BEST FOR MAIN CROP.

1 oz. to 1500 plants. 4 to 6 oz. (to transplant), for an acre.

CULTURE.—Seed may be started in hot-beds in March or sufficient plants for family use can be grown in pots or boxes in-doors with very little trouble.

Be particular to give plants the benefit of the fresh air and sun whenever judicious, for the purpose of hardening them: and cover with mats when necessary to prevent them from frosting. The two extremes of heat or cold are equally injurious. It is customary with the best gardeners to remove the plants from the hot-beds to the cold frames, allowing a distance of several inches between the plants. In May select and prepare the soil, and set the plants three feet apart each way. Hoe and draw earth to the stem. When the plants crowd, the fruit will be small. Have the soil very rich. For general crop, sow from middle of April or during May, in open air, selecting good soil, in a location much exposed to the sun and sheltered by a hill, fence or woods on the North

DWARF CHAMPION TOMATO.

New Stone.—This tomato ripens for main crop, is very large and of bright scarlet color, very smooth, ripens evenly to the stem without a crack, exceedingly solid and firm flesh, (as its name indicates). (See cut). Pkt. 5c. Oz. 2cc. $\frac{1}{4}$ lb. 60c. Lb. \$1 75.

TOMATO.—CONTINUED.

Livingston's Beauty.—A decided favorite for home market or shipping purposes, being early, hardy, a strong grower, productive, large size, always smooth, perfect in shape and excellent in quality. The color is a very glossy crimson with a tinge of purple. It grows in clusters of four to six large fruits, retaining its large size late in the season. It ripens with Acme and Perfection, and is entirely free from ribbed and elongated fruit. It is very firm fleshed, has a tough skin and but few seeds. It seldom rots or cracks after a rain like many of the tender skinned sorts. For shipping and early market it cannot be excelled, on account of solidity, toughness of skin, and especially its handsome color; it can be picked quite green, and look well and ripen up nicely, will keep perfectly for a week after it is ripe. Used largely by marketmen and long distance shippers everywhere. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 60c. Lb. \$1.75.

Acme.—One of the earliest and best purple sorts; of medium size, perfectly smooth, very solid and a great bearer, crimson color with a pinkish cast. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 50c. Lb. \$1.75.

Buckeye State.—Very productive; large, smooth, purple. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 60c. Lb. \$2.00.

Trophy.—Very large, solid and generally smooth; selected strain. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 60c. Lb. \$2.00.

Prizetaker.—A splendid marketable tomato. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 50c. Lb. \$1.75.

Queen.—Large, perfect tomato. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 60c. Lb. \$2.00.

Dwarf Champion.—This new tomato is dwarf and compact in growth, the plants growing stiff and upright, with thick jointed stems and foliage unlike any other tomato. It is very early, smooth, medium size, sound, handsome and abundant bearer. Pkt. 5c. Oz. 25c. $\frac{1}{4}$ lb. 90c. Lb. \$3.00. (See cut).

Paragon.—Somewhat resembles the Queen and an immense cropper. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 60c. Lb. \$1.75.

Favorite.—This is a large, perfect shaped tomato. One of the best. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 60c. Lb. \$2.00.

Livingston's Magnus.—New; large, late, purple; potato-leaf foliage, and most delicious flavor. Pkt. 5c. Oz. 25c. $\frac{1}{4}$ lb. 60c. Lb. \$2.00.

Perfection Tomato.—An old reliable sort of much merit. Pkt. 5c. Oz. 20c. $\frac{1}{4}$ lb. 60c. Lb. \$2.00.

Trucker's Favorite.—The best of all main crop, purple colored tomatoes. It originated in Burlington County, N. J.

It is one of the largest tomatoes grown, and is most regular in shape and size. Color purplish-red, very solid, firm flesh, a good keeper, and not subject to rot or crack on the vines. It is an excellent shipper, and sold in Philadelphia markets at better prices than any other variety at the same time. Pkt. 5c. Oz. 30c. $\frac{1}{4}$ lb. 75c. Lb. \$3.00.

TOBACCO.

CULTURE.—Sow in hot-beds or in open ground, soon as can be worked in spring, when plants are large enough, transplant in rows three feet each way.

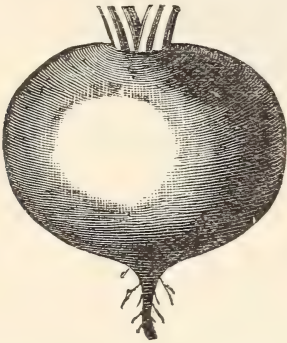

Connecticut Seed Leaf.—Pkt. 5c. Oz. 25c.

TURNIPS.

(Steckrube).

1¼ to 2 lbs. to the acre.

CULTURE.—Choose good sandy, pliant soil. Where the soil is poor, incorporate rotten manure. Choice determines between sowing in drills and broadcast, but in respect to Ruta-Baga, experience inclines to drills. Drills should be 18 inches apart, and the plants 8 or 10 inches distant in the rows. Thinning is equally necessary when sown broadcast. Good cultivation will improve the crop. During November remove the crop in anticipation of frost, trim the leaves within one or two inches of the bulb, then store the turnips away in the cellar, covering freely with straw, and sheltering all with a covering of dry earth. The same precaution will protect them out-doors. Pile the turnips in hills, small at the top, sloping gradually, and observe the same form of the covering to prevent the lodgement of moisture.

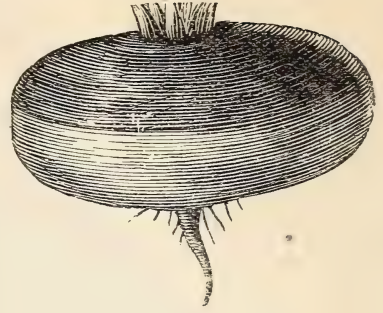

Purple Top White Globe.—A standard white variety, with purple top, handsome, globe shaped, and heavy cropper; leading turnip among truckers and gardeners. Oz. 5c. Lb. 40c.

Amber Globe.—A good variety for general crop. Flesh, solid and sweet; keeps well late in spring, grows large; fine for table or stock. Oz. 5c. Lb. 40c.

Yellow Aberdeen.—Hardy, good keeping turnip; yellow flesh and very productive. Oz. 5c. Lb. 40c.

NOTICE.

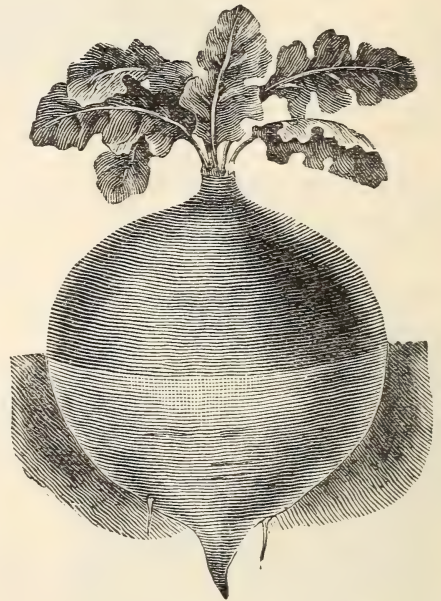

The greatest care is taken to supply every article true to name, and of the very best quality; at the same time it is understood that we do not warrant our seeds and that we are not in any respect responsible for any loss or damage arising from any failure thereof.

RED TOP STRAP LEAVED TURNIP.

Purple Top White Flat.—A rapid growing white, flat, strap leaf turnip, with purple top; mild flavor, and very popular for early use and general crop. Oz. 5c. Lb. 40c.

RUTA-BAGA.

Improved American Purple-Top Ruta-Baga.—Very hardy and productive; flesh, yellow, solid and sweet; good for table use or stock. (See cut). Oz. 5c. Lb. 40c.

For culture, see turnip.

Observe, that on account of short crops in some varieties of seeds, prices are subject to change without notice.

HERBS.

(Gewortze)

Sow early in April or May, in a sheltered, well-prepared spot in the open ground, either broadcast or in shallow drills about seven inches apart. Thin out the plants thus raised, and keep clear from weeds. A few sweet aromatic and medicinal herbs are very valuable for flavoring soups, etc., and care should be taken to harvest them properly on a dry day, as they come into full blossom, then dry quickly and pack closely, entirely excluding the air.

GRASS AND CLOVER SEEDS.

Kentucky Blue Grass.—Also called June Grass, Smooth Stalked Meadow Grass, Green Meadow Grass, and Spear Grass. Perennial. Height, 10 to 15 inches. This valuable grass is suited to a variety of soils, from an average dry one to moist meadows, and as a pasture grass is indispensable. It is very productive, unusually early, and presents a beautiful green appearance in early spring, while other grasses are yet dormant. It makes a splendid lawn grass, forming a thick turf, and being of very even growth, producing only one flowering stem a year, while many other grasses continue to shoot up flower stalks throughout the season. Kentucky Blue grass also makes hay of excellent quality, but the yield for this purpose is not equal to some other grasses. Sow (if alone) 40 lbs. per acre: weight per bushel 14 lbs.

Orchard Grass.—Perennial, height 3 feet. It blossoms about the same time as Red Clover, making it on that account, a desirable mixture with that plant. It is exceedingly palatable to stock of all kinds, and its power of enduring the cropping of cattle commend it as one of the very best pasture grasses. Sow 35 lbs. to the acre; weight per bushel 14 lbs.

Red Top Grass.—(*Agrostis Vulgaris*, Herd's Grass, Bent Grass, Creeping Bent Grass, Quick Grass). Perennial, height 1 to 2 feet. Valuable either for lawn mixtures, mixing in hay, or permanent pasture grasses: is common throughout the country; succeeds almost everywhere, but reaches its highest state of perfection in a moist, rich soil, in which it attains a height of 2 to 2½ feet. Sow, if alone, 45 lbs. per acre; weight per bushel 14 lbs.

Fancy Pure Seed.—Weight about 32 lbs. per bushel. Sow 10 to 12 lbs. per acre.

Red Clover Medium.—The common variety, used with other grasses for either pasture or meadow.

Red Clover. Mammoth or Pea Vine.—Grows 5 or 6 feet high, with large, coarse stalks, and is largely used for plowing under for manure.

Crimson Trefoil or Scarlet Italian Clover.—This is a variety in common use in the South for feeding green. The yield in fodder is immense, and after cutting, it at once commences growing again, and continues until severe, cold, freezing weather. In warm climates, four or five cuttings are made during the season. It grows about 1 foot high, blossoms long, pointed, and of a very deep red or carmine color. Makes good hay.

MILLET.

Golden or German.—This is a valuable forage plant and yields very heavy crops; grows from 2 to 4 feet high, heads single and similar to Hungarian, though large and with bright yellow oval seeds.

BUCKWHEAT.

Japanese.—The straw is heavier, it branches more, and does not need to be sown as thickly as the other kinds.

Silver Hull.—A heavy yielder; the berry is of a light silvery-gray color.

Timothy.—A well-known grass, and on some soils it will produce a larger crop than any other variety. We carry a large stock of this seed, which is graded as "Prime," "Strictly Prime," and "Choice."

Alsike or Hybrid Clover.—Even clover-sick lands will produce a good crop of this; perennial and very hardy. It is very valuable both for pasturing and soiling; very productive, sweet and fragrant. The flowers are a distinct light pink, and much liked by bees. Sow in spring or fall; 6 lbs. to an acre.

Lucerne or Alfalfa.—Very productive, succeeds in any good soil, and lasts for a number of years. It thrives on dry, rich sandy soil, producing three to four cuttings annually, and even in seasons of severe drought is always fresh and green, because the roots extend so deep into the soil. It grows 2 to 3 feet high, with purple blossoms. It yields an immense amount of green food for cattle, and should be cut when commencing to bloom, or it can be used as ordinary clover hay. Instead of exhausting the land, it increases fertility, but does not succeed on compact clay or on land with impermeable subsoil. Sow 10 to 15 lbs. to an acre.

SOUTHERN COW PEAS.

The Great Land Renovator.

Their value as a fertilizing crop exceeds that of clover, for in addition to being a larger Nitrogen gatherer than clover, they draw from the subsoil to the surface large amounts of both Potash and Phosphoric acid, thus putting the soil in most excellent condition for following crops.

Sow 1¼ to 1¾ bushels per acre, on land thoroughly pulverized, and disk or plow with a cultivator or double shovel plow. If wanted for hay, cut when peas are forming, cure as clover. If peas are for fertilizer, sow same quantity after same preparation as for hay, turn under when peas are in bloom. If farmers will first roll and disk peas, they will turn under much easier and be more satisfactory. For a fertilizer, especially to be followed by wheat or corn, they are simply the best. Bear in mind that the Southern Cow Pea belongs to the Bean family, therefore must not be sown until the ground is thoroughly warm and all danger from frost is past.

FIELD CORN.

(Feld Korn).

Golden Beauty.—A large, broad-grained yellow corn, with ears of perfect shape and very small cob. The richness of color and quality of the grain makes it a very superior variety. Ear well filled and very productive. Qt. 10c. Pk. 50c. Bu. \$1.25.

Hickory King.—A large, broad grained white corn, and undoubtedly the smallest cob of any white corn ever introduced. Qt. 10c. Pk. 50c. Bu. \$1.25.

SEED WHEAT, RYE AND OATS.

Write for special prices on Clover and Grass Seeds.

INSECT DESTROYERS.

The great merit of this Insecticide lies in its non-poisonous properties. No danger need be apprehended by the person applying it, nor will it injure animals, should they eat it—unless in large quantities. It does not render injurious the vegetables or fruits to which it is applied, and yet it is probably the best Insect Destroyer that has ever been offered. It is particularly useful for the prevention and destruction of Potato Bugs and all Worms and Insects that infest our gardens.

5 pound package for 25 cts. 10 pound package for 45 cts. Special prices on larger quantities in bulk.

CAPITOL CITY LAWN GRASS SEED.

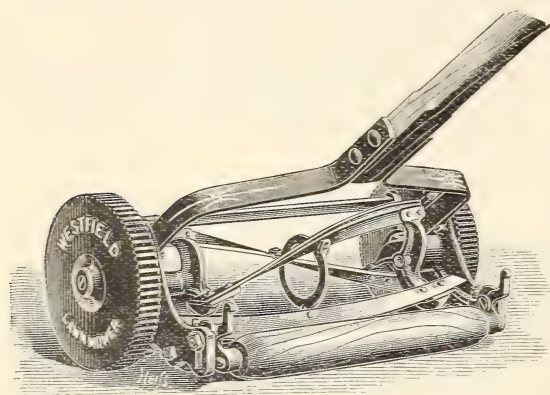

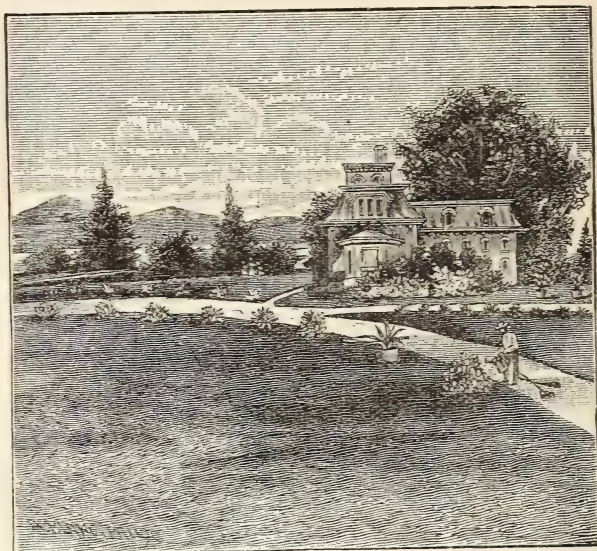

Our mixture of Grass Seeds for Lawns, Parks, Tennis and Cricket grounds is composed of the finest varieties of grasses, each of which has its season of beauty, and the result of this blending, is the producing of a sod that is not only always evergreen and velvety in appearance, but of the color and beauty of the emerald.

Seeding is preferable to sodding, because it is cheaper, and will soon cover the earth with a luxuriant growth of thrifty grass and if fertilized spring and fall will last indefinitely.

Frequent mowing prevents natural seeding, which grasses annually supply in abundance to restore and thicken sod. Hence, when the grass is injured by tramping or thinned by any other cause, the best and most natural method to restore its beauty is to sow seed plentifully. Use two pounds of seed on a space 20x40, or 800 square feet.

To prepare the ground for seeding Lawn grass, it should be plowed deeply, cross plowed, and the soil finely pulverized and enriched. Use fertilizer and avoid the danger of an importation of seeds, the growth of sorrel, weeds, etc., liable to be in barnyard manure.

The seed should be covered very slightly and a roller run over the ground after sowing. Pt. 10c. Qt. 20c. Lb. 25c. Pk. 75c. Bu. (of 14 lb.) \$2.50.

THE DOUBLE TUBE

No. 9

Lightning Insect Exterminator.

These Sprayers throw a very fine spray of any liquids usually used for destroying insects, bugs, etc., and for keeping cattle free from flies during the summer weather. They are particularly recommended for spraying all kinds of plants, bushes, vines, trees, interior of henneries, and also for spraying horses and cattle to keep off the flies.

Price.....75 Cents.

THE

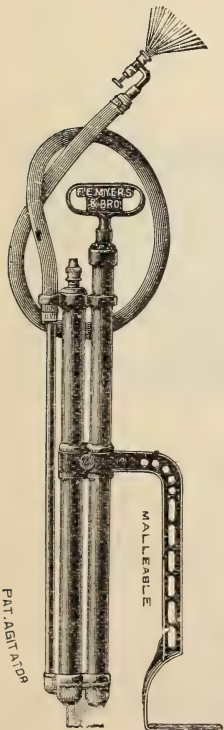

Myers Imperial Brass Spray Pump.

This Spray Pump is constructed entirely of brass, a material that is not affected by the poisonous arsenites used in different formulas for spraying fruit trees, vines and shrubbery. It is so arranged that the labor of pumping is all done on the downward stroke of the piston and nothing on the up. The effect of this operation while pumping is to hold the pump down. The foot rest steadies the pump, holding it in the proper position.

It is provided with a large air chamber, and has ball valves, the pressure is held uniformly in the air chamber and on the hose, so that the nozzle throws a continuous spray, and is not affected by the movement of the plunger. The operator is enabled to keep a constant pressure on the nozzle of from fifty to one hundred pounds with very ordinary exertion. Will throw a solid stream fifty feet, and is of unusual value for washing windows, buggies, and extinguishing fires, sprinkling lawns, flowers, etc.

For spraying it is so arranged as to discharge a fine jet in the bottom of bucket, to keep the solution thoroughly mixed and agitated, a feature peculiar to this pump only, and a very necessary feature to a spray pump.

Kain Gardeners' Harrow.

Made in one section, contains 30 and 24 teeth. It has no equal as a tool for market gardeners. Designed to be used for one horse, and is easily handled in small garden plots. The harrow is strong and durable and is furnished with runners for transportation.

24 tooth harrow, cuts 3 ft. 8 in. wide.....	\$6.00
30 " " " 4 ft. 6 in. "	7.00

The Kain Two-Section Harrow.

The above cut represents the Kain Two-Section Harrow.

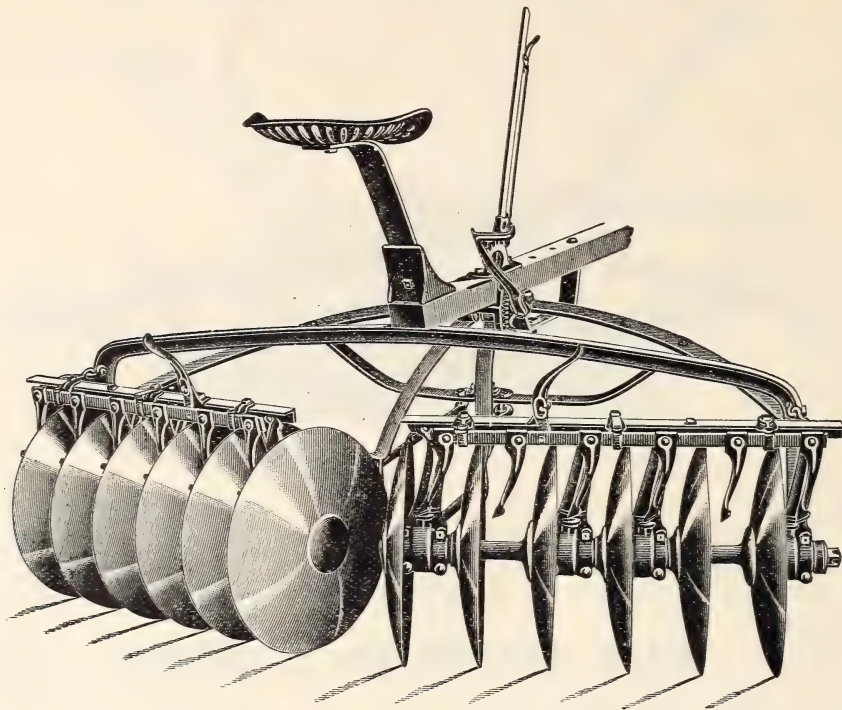

We make two sizes of this harrow. The larger size has 50 teeth and cuts eight feet and six inches wide. The smaller size has 40 teeth and cuts six feet and six inches wide.

Our two-section harrows are guaranteed better make, better finish, and have more superior points of excellence than ordinary Scotch harrows to which they should not be confounded.

2-section, 40 teeth	\$ 9.00
3-section, 45 teeth	12.00

Buffalo Pitts Spring Flexible Disc Harrow.

WITH SPRING ACTION ON THE DISC GANGS.

The only Disc Harrow made having a spring pressure device, which alone places it far in advance of any competitor. The greatest objection to all other disc harrows, is the "humping-up" in the centre, causing the outer discs to run deeper than the centre ones with consequent uneven depth of work. This is all overcome on the Pitts by a pair of flexible steel springs running from the pole to the main axle, controlled by foot of driver.

Automatic Star Sickle and Tool Grinder.

READY FOR OPERATION.

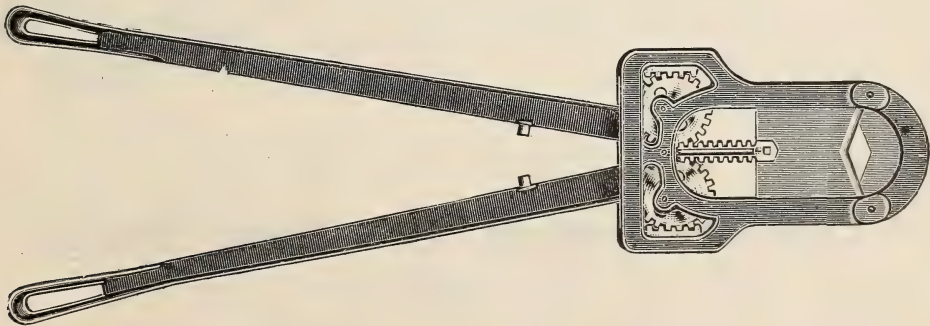

Weight 25 pounds.

Price.....\$4.50

Dr. H. W. Leavitt's Latest Improvement in Dehorning Clippers is the "V" shape blade, the advantages of which are self-evident, as a glance at the cut will show.

Dr. Leavitt's "V" shape blade Dehorning Clipper Cuts all around the Horn as the Handles are Being Closed.

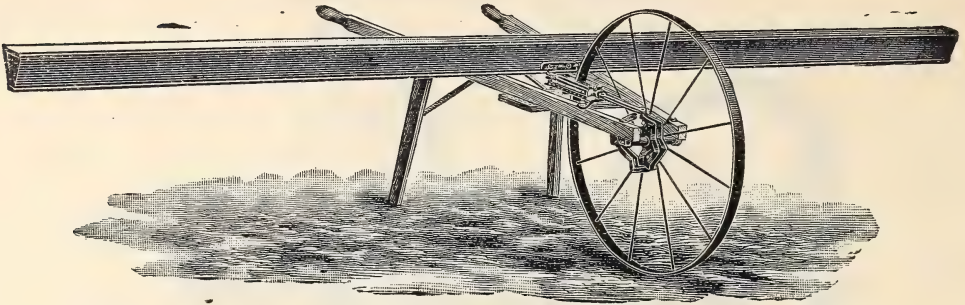

Knives cannot inter-lock, or cut into each other. It is our latest improvement, and is guaranteed to be superior to any other dehorner made. This style dehorner is made in the large size (No. 3) only, but will clip the horns, clean and smooth, from cattle of any age. Any style of our machines have the same power and guarantee.

By its construction, as shown in the above cut, you will see that it has a set of cogs in frame as well as in the cogged plunger which enables the knife to be moved twice as far by the same movement of the handles, or the instrument is manipulated by a movement of the handles one-half the distance of our old patent.

Price.....\$7.00

Star Force-Feed Grass Seeder.

THE LATEST AND BEST WHEELBARROW SEEDER ON THE MARKET.

It not only forces the seed out when in operation but prevents the seed from escaping of its own weight when not in use. The device for changing quantity is exceedingly simple, sowing from $2\frac{1}{2}$ to 46 pounds of clover seed to acre or any intermediate quantity. Seeders that change quantity by a bolt in a series of holes cannot sow the intermediate quantities represented by the space between the holes.

It is with renewed confidence that we offer the "**Star**" Seeder having enjoyed a large trade in the last several years and received unqualified endorsements.

THE PLANET JR. GARDEN TOOLS.

A separate catalogue containing full line of the Planet Jr. Implements will be sent to all who apply for it.

Planet Jr. No. 4 Combined Hill and Drill Seeder, Single Wheel Hoe, Cultivator and Plow.

Price, complete.....\$10.00
 " as a Drill only..... 8.00

This admirable tool combines in a single convenient implement a capital hill-dropping seeder, a perfect drill seeder, a single wheel hoe, a cultivator, and a plow. It holds two quarts and as a seeder is like the No. 5, sowing in continuous rows, or dropping in hills at five different distances. It is thrown out of gear by simply raising the handles. The index is accurate, simple and easily set. The drill is detached and the tool frame substituted by removing but one bolt. It then becomes a single wheel hoe, garden plow or cultivator. It is useful almost

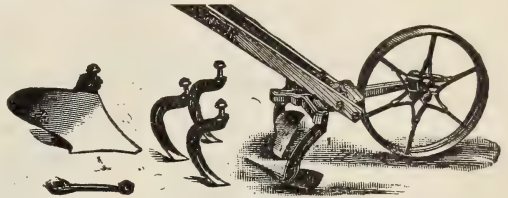

every day of the season, at every stage of garden work. With this one implement the small farmer can do practically all the work in his small crops,

A set of three rakes supplied when specially ordered. Price.....\$1.00

No. 12 Double Wheel Hoe, Cultivator and Plow.

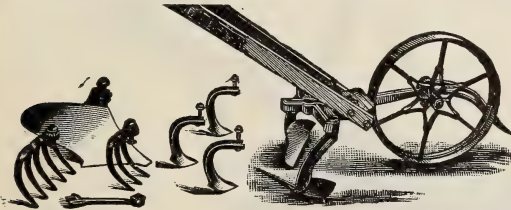

Price.....\$6.50

This tool is identical with No. 11 Wheel Hoe, except that it has fewer attachments, and is sold at correspondingly less price. The tools shown and sold with No. 12 are what gardeners use most, and the others can be added as wanted.

Planet Jr. No. 16 Single Wheel Hoe, Cultivator, Rake and Plow.

Price.....\$5.35

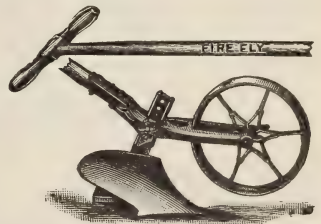

The latest and best single wheel hoe has a very full set of tools, several of them being of new design, such as have been found to work in the very best manner. It has 11 inch wheel, with broad face; is very light, strong and easy running. It has adjustable handles and quick-change frame. The tools are a well-shaped plow for marking out, plowing, covering, and late cultivation; a pair of 6-inch shield hoes and three all steel patent cultivator teeth; also a set

of two rakes, just the thing for preparing ground for the seed drill. A practical leaf-guard holds up the plants, while thorough work is being done underneath: the frame changes in height, and the wheel may be attached to the other side of the frame, when both sides of the row may be hoed at one passage.

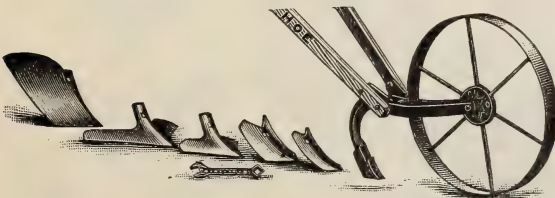

The Fire-Fly Garden Plow.

Price.....\$2.25

This tool is most useful in small gardens, opening furrows for manure or seeds, and covering them quickly. Chicken raisers will find it very useful in plowing up the scratch yards. The moldboard is of tempered and polished steel: the depth is quickly changed.

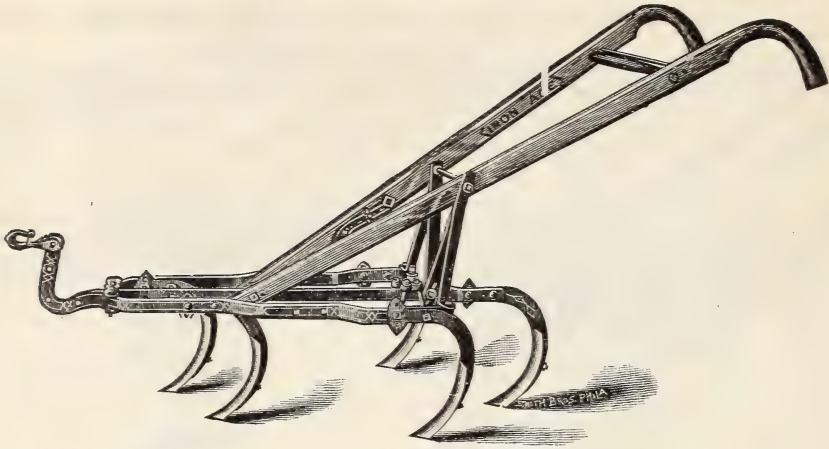

Farmers No. 19 Single Wheel Hoe, Cultivator and Plow.—Price, \$3.50.

This new and attractive implement is especially designed for the Farmer's Garden Work, though it offers to everyone with either field or garden, a cheap and effective tool for all hand wheel hoe operations.

The wheel is high and is made with stiff steel rim and spokes, and a combination steel and malleable iron hub. The wheel arms are steel and the frame of the tool is attached adjustably to the wheel arms, so that the

height of the handles may be readily changed to suit man or boy. The standard is slotted to make regulation of depth easy and by means of an adjustable malleable filling piece, the same standard is made to carry perfectly all the steels that come with the machine.

DIXIE STEEL FRAME CULTIVATOR.

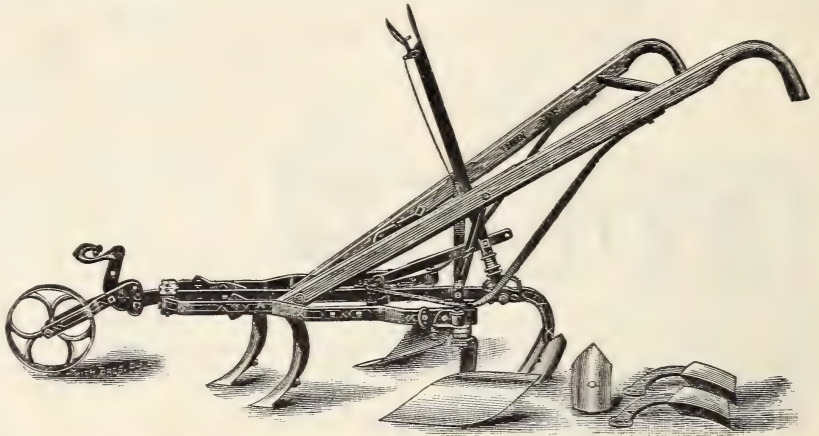

In all respects the best Five Tooth Cultivator built. Steel expanding frame, reversible steel teeth with or without lever as desired.

Price.....**\$2.50** Add for lever expander.....**50c.** Add for wheel..... **75c.**

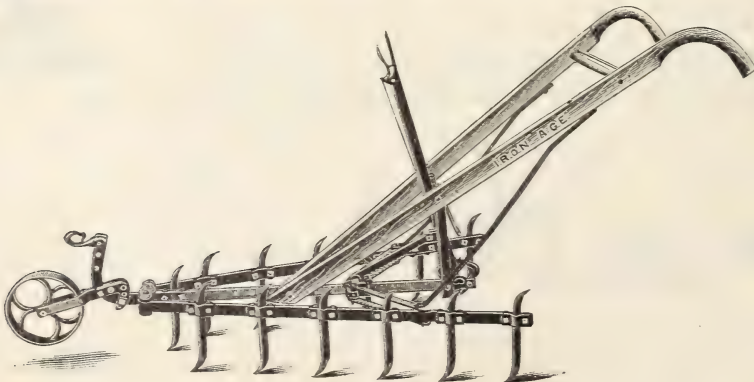

THE IRON AGE HORSE HOE.

Wheel and Cultivator Combination—with or without Lever Adjuster.

The Iron Age is celebrated for solidity of construction, adaptation to a great variety of purposes and ease of handling. The reversible hoes or plows of Horse Hoes are bolted to solid steel standards of their own (not attached to light cultivator standards). The value of the Iron Age as a corn coverer is now well known, also for covering peas, potatoes, etc., and for making up rows for root crops it is not surpassed.

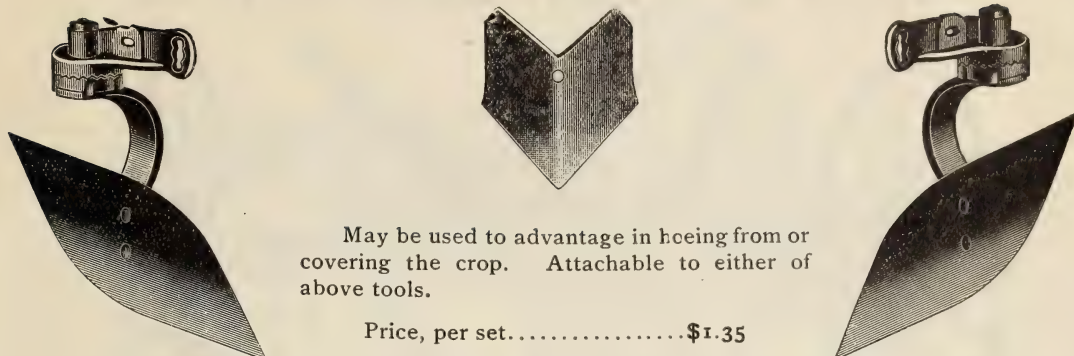

Price, hoe and cultivator, plain....**\$4.50** With wheel....**\$5.50** With lever and wheel...**\$6.00**

SINGLE, DOUBLE AND TRIPLE TREES—AT LOWEST PRICES.

Iron Age Cultivator Points and Steels.

Hand or Weight Dump Rake.

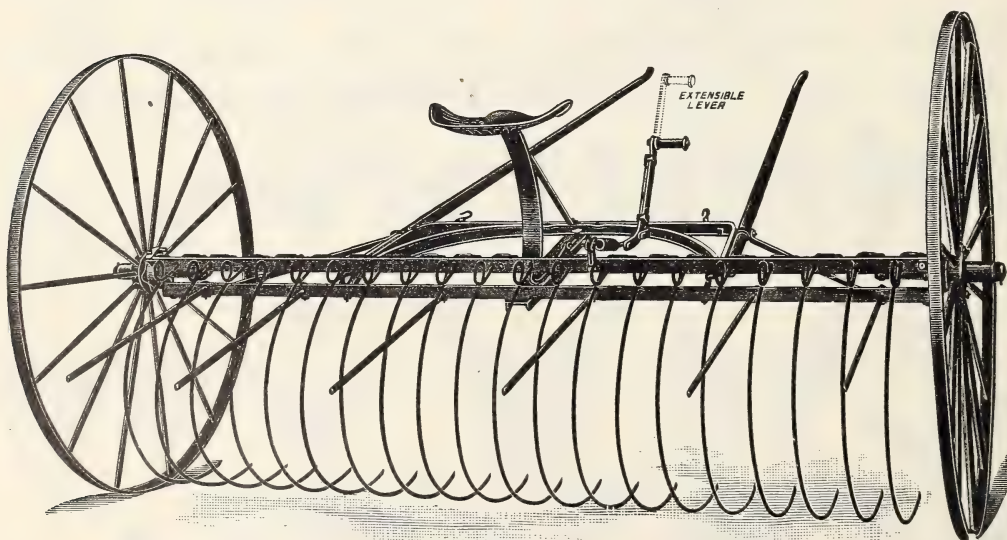

Price, with combined Pole and Shafts.....**\$18.00**

This rake has $1\frac{1}{4}$ inch steel axle extending from wheel to wheel, giving great strength and preventing any sagging.

We call it a "Hand-Dump Rake" but it is really a "Weight-Dump," as the weight of driver practically does the dumping after a slight upward tilt on the handle, unlocks the rake. The powerful **lock lever** is used, an ingenious joint which holds the teeth firmly to their work without use of hands or feet of operator, and preventing the annoyance of dumping when full, before reaching line of windrow. Over the teeth are placed steel coil springs giving great elasticity, and breakage is practically unknown. Built of best material, finished in first-class style, and guaranteed throughout.

All-Steel Self Dump Rake.

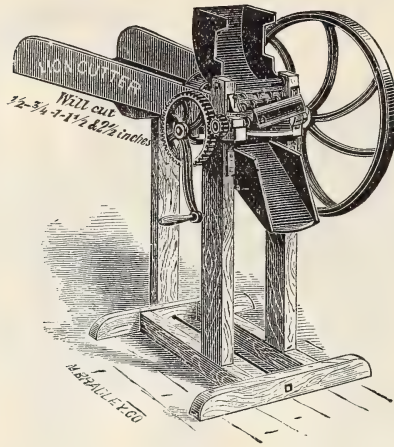

Price.....**\$22.00**

This rake is built entirely of steel and has a patent relieving spring which prevents jar in dumping. It has a combination hand and foot lever, a spring cleaner to guard-tooth between wheel and teeth to prevent hay from twisting into the wheels, and is up-to-date in all particulars. Strongly built and nicely Finished.

Extra teeth to fit all Rakes:—**Tiger, Thomas, Ohio, Taylor, Wood, 30 Cents.**
Forks for all Tedders:—**Bullard, Thomas, Chieftain, Sterling, Tiger, 45 Cents.**

The Lion Feed Cutter.

DESCRIPTION AND SIZE.

No. 1 Machine, as shown in the above cut, has two knives $6\frac{1}{4}$ inches long; cuts $\frac{1}{2}$, $\frac{3}{4}$ and $1\frac{1}{8}$ inches long. Weight, 110 pounds.

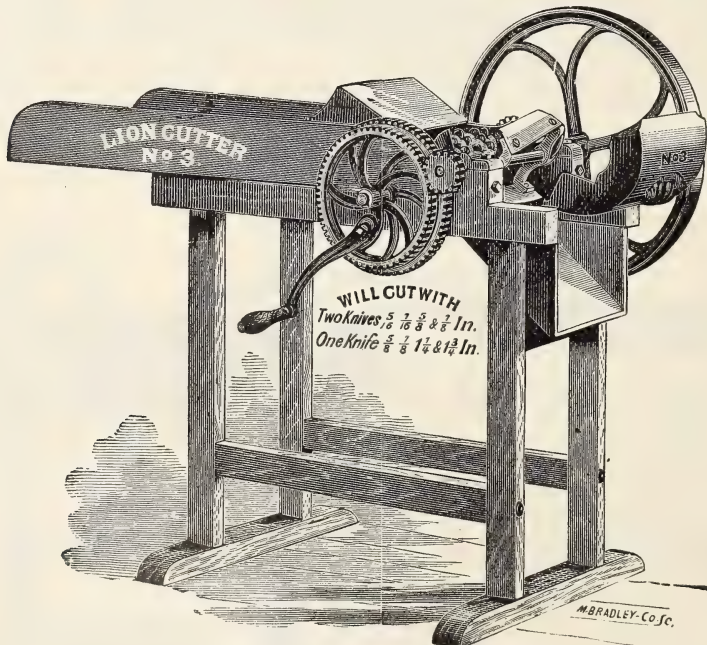

Price.....\$12.00

GIBBS POST HOLE DIGGER

WITH SINGLE BLADE

Works successfully in all kinds of soil where most diggers fail.

Advantages:—Easiest operated. Very durable. More soil can be brought out at one time and with less labor. Scours or cleans better in mucky soil. All wearing parts have steel pins. Blade is made of best tempered cast steel; the rod and yoke are also steel. Only one blade to keep sharpened. Makes a hole of any desired diameter. By the use of the compound lever operating blade, ordinary stones that obstruct digging are readily loosened and removed. Best general purpose digger made.

STAVER COMMON-SENSE SAW.

BALANCE WHEEL OUT OF THE WAY.

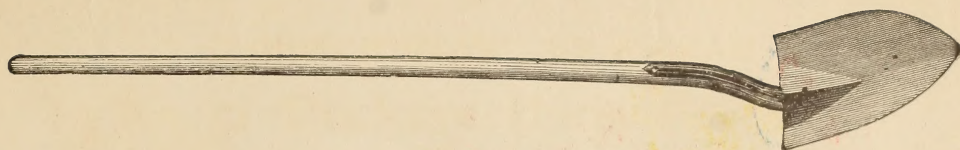

WEIGHT 350 POUNDS.

We have made numerous experiments on a saw as above shown with balance wheel under the table, where it will be out of the way in sawing poles. Our first efforts were not successful, but we now have a saw that does the work and is a success. Farmers and others who use saws can at once appreciate the great convenience of this machine. It has a swing table, which is the best style for cutting cord-wood and poles. The balance wheel is entirely out of the way, being placed under and to one side of the saw shaft. A short belt with automatic tightener transmits power from balance wheel shaft to saw shaft. This device is simple but very effective.

One man can do the work on this saw as readily as two men on the regular style saw.

Price.....\$45.00

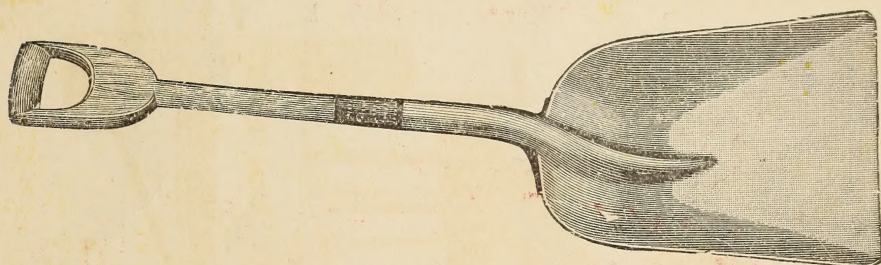

Special discount for cash.
